Двоходівки

Двоходівки.Тема: щонайменше один мат у розв'язці - королівською батареєю.

Twomovers.Theme: at least one post-key mate must come from a royal battery.

Двухходовки.Тема: как минимум, один мат в решении – королевской батареей.

Judge: Robert Lincoln (USA)

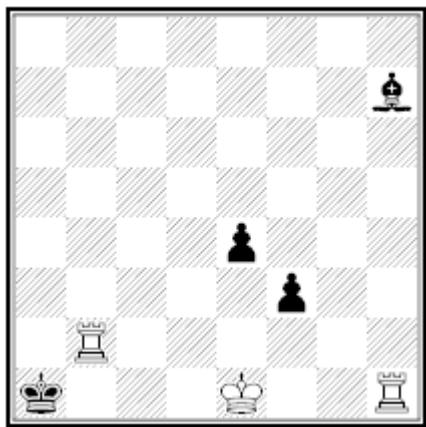

Participants:

Aleksandr Tsaplin (Ukraina), Borislav Atanasov (Bulgaria), Mykola Chernyavskyy (Ukraine), Bosko Miloseski (Macedonia), Carlos Grassano (Argentina), Eligiusz Zimmer (Poland), Mikhail Chernushko (Russia), Dieter Müller (Germany), Fedir Kapustin (Ukraine), Myron Gnatyna (Ukraine), Ingemar Lind (Sweden), Karol Mlynka (Slovakia), Petro Novitskyi (Ukraine), Pietro Pitton (Italia), Pavel Murashev (Russia), Valery Shanshin (Russia), Jaroslav Brzozowicz (Poland), Suleyman Abdullayev (Azerbaijan), Valery Kopyl & Valery Krivenko (Ukraine), Zoltan Labai (Slovakia), Zvonimir Hernitz (Croatia), Michael McDowell (United Kingdom), Gábor Tar (Hungary), Georgi Hadzi-Vaskov (Macedonia), Viktor Pylypenko (Ukraine).

This tourney was successful by attracting nearly one hundred entries. However, many were anticipated. Some composers reworked ideas shown in the Appendix. I particularly looked for originality which combined notable side lines in addition to the royal battery requirement.

The top honors go to No.1. The key, 1.Rc2! (2.Kd2, Kf2, O-O#), cleverly shuts off the BB. 1.Rd2? would not solve because of 1...e3! There is complete separation of threats after 1...Kb1 2.Kd2#, 1...f2+ 2.Kxf2# and 1...e3 2.O-O#. This splendid notion of White castling within a Fleck scheme deserves highest praise.

2.Pavel Murashev, Russia

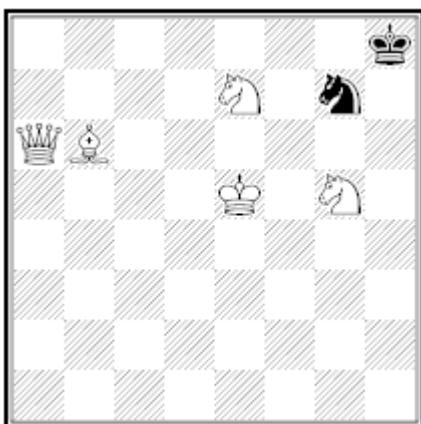

2nd Prize

5+2 **2#**

No.2 has a half-battery that operates differently in virtual and actual phases. 1.Ke7? (zz) returns 1...B~ 2.Sh6# and 1...Bxg8 2.Rdxg8#, but 1...Bg6! Instead, 1.Se7! (zz) brings 1...B~ 2.Kf7# and 1...Bg6 (or 1... Bg8) 2.S(x)g6#. These changes are very absorbing. Both try and key arrive on same square — the Bournemouth theme.

3.Suleyman Abdullayev, Azerbaijan
3rd Prize

5+2 **2#**

An ingenious concept is seen in **No.3**. Double threats do not faze a determined defender. 1.Qc4? (2.Sg6, Qg8#) meets 1...Se6! 1.Qd3? (2.Sf7, Qh7#) runs into 1...Sf5! The right way is **1.Bd4!** (2.Qh6#) where the quondam refutations are captured when 1...Se6 2.Kxe6# and 1...Sf5 2.Kxf5#.

4.Petro Novitskyi, Ukraine
4th Prize

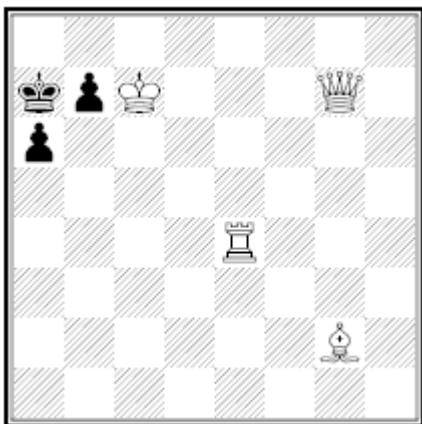

5+2 **2#**

Two interesting tries animate **No.4**. 1.Ra7? (zz) waits for 1...B~ 2.R(x)h7#, but 1...Bf7! 1.Bf7? (zz) hopes for 1...Bxf7 (or 1...Kh7) 2.Rh6#, but 1...Bh7! Correct is **1.Rc7!** (zz) giving fresh responses for 1...B~ 2.R(x)h7# and 1...Bf7 2.Kxf7#.

5.Eligiusz Zimmer, Poland

Only one royal battery accompanies **No.5**. Nonetheless, there is a good mixture of mates throughout. 1.Qd4+? has 1...Ka8 2.Re8#, but 1...b6! 1.Kc8? (2.Qxb7#) is defeated 1...Kb6! 1.Qg8? (2.Qb8#) falls to 1...a5! Finally, **1.Ra4!** (zz) conquers. Variations are 1...a5 2.Rxa5#, 1...b6 2.Kc8#, 1...b5 2.Qd4#, and 1...Ka8 2.Rxa6#. Had that WR been placed at f3, another worthy try is produced by 1.Rf5? (zz) 1...Ka8!

6.Suleyman Abdullayev, Azerbaijan

No intricate tactics are found in **No.6**. Still, a straightforward **1.Qe7!** (2.Qxa7#) delivers abundant value featuring three battery openings along with those WQ blows: 1...Rb7 2.Qxb7#, 1...Rd7 2.Kxd7#, 1...Rxe7 2.Kxe7#, and 1...R-else 2.K(x)c7#.

7.Karol Mlynka, Slovakia

No.7 is an Ojanen theme layout much more economical than the sample in the appendix. It is not a closed system since random moves permit all threats to ensue. Yet, intense efforts to utilize minimal means should be recognized. 1.Bg2! (2.Kc5, Kb5, Kd7#) takes new paths upon 1...Sxc7 2.Kxc7, 1...Sd6 2.Kxd6#, and 1...a6 2.Kb6#.

8.Bosko Miloseski, Macedonia

Unprovided flight and checks mar No.8. Unfortunately, no other method could put this process into motion. So, one must be content with 1.Qg3! (2.Qg2#). Now, a BR “cross” prizes open the looming battery four times: 1...Rf4+ 2.Kxf4#, 1...Rg4 2.Kxg4#, 1...Re3+ 2.Kxe3#, and 1...Re2 2.Kxe2#.

An amusing **No.9** has a probe where 1.Qf8? (zz) travels around the WK to fetch 1...Ke3 2.Qf4#, and 1...Kd5 2.Qf5#, but 1...h4! remains. So, **1.Qxh5!** (zz) assumes a vantage point behind the WK to inflict 1...Ke3 2.Qe2# and 1...Kd5 2.Kf4#.

10.Jaroslaw Brzozowicz, Poland Comm.

2#

No.10 contains an earnest attempt to achieve full-blown Fleck dissection on the a-file. **1.Ra2!** (2.Kxb4, Kb3, Kb5#) gets suitably divided by 1...Sd4 2.Kxb4#, 1...b3 2.Kxb3#, and 1...Ka7 2.Kb5#. But other arbitrary Black replies reduce this arrangement to “partial” Fleck.

11.Ingemar Lind, Sweden Comm.

2#

No, 1.Kd7? is not checkmate for **No.11**. The little joke is that Black plays first rendering 0...b5 1.a6 b4 2.Kd7# or 0...a6 1.Kd7+ Ka7 2.Bb6#. Such mischievous retros are always fun.

The top rank battery of **No.12** only fires twice, but that BS unexpectedly becomes useful. The play goes **1.Rd7!** (**2.Qb7#**) **1...Rxd7+** **2.Kxd7#**, **1...Sc7** **2.Kxc7#**, and **1...Sd6** **2.Qa7#**.

13.Fedir Kapustin, Ukraine

Two tries help enliven **No.13**. **1.Ra6?** (**2.g4#**) gets jilted **1...fxg3!** while **1.Ra7?** (**2.Rh7#**) is negated **1...Kh6!** These rescues boomerang after **1.Rh1!** (**zz**) with **1...fxg3** **2.Kxg3#**, **1...Kh6** **2.Kg4#**, and **1...f2** **2.Kg2#**.

Stalemate relief prepares the batteries in **No.14**. To begin, 1.Kh4! (zz) seeks out 1...Kh1 2.Kxg3#. The twinned companion has 1.Ke3! (zz) sneak in for 1...Kg1 2.Kf3#.

Despite the double threat, the classic **No.16** sets a standard for orthogonal royal battery which has never been bettered. 1.Qc6! (2.Rb5, Kd6#) 1...Bxc6+ 2.Kxc6#, 1...Be6+ 2.Kxe6#, 1...Rc4 2.Kxc4#, 1...Rd4+ 2.Kxd4#, 1...Re4 2.Kxe4# and 1...Rb4 2.Ra6#.

The BK walks into an orthogonal and diagonal battery in **No.17**. 1.Qd2! (2.Qd5#) proves to be a spoof threat. Mates are 1...Kg5 2.Ke4# and 1...Ke6 2.Kf4#.

The Ojanen pattern in **No.18** is the epitome of demonstrating six diagonal mates by WK. 1.Bb2! (2.Kc4, Kd2, Kb4#) 1...e3 2.Kd3#, 1...Sb3 2.Kxb3#, and 1...Sc2 2.Kxc2#.

I expected to get somewhere around 30 entries for this tourney, at most around 40 - and I got as much as 80! Is this maybe a new record for the Problemist Ukraynny Theme Tourneys!? Some of the entries were basically the same problem with some different settings, and some entries could be excluded because of anticipations or severe duals - but the final number of entries was still much more than I expected.

The overall quality of the entries was pretty good - maybe not so many top notch entries, but still several interesting renderings of the theme. After all, the theme is not very easy to make masterpieces from.

Here is my award:

An excellent rendering of the theme. Very good key, which gives a flight and sets black in zugzwang. Good try-play, where both the K and S refutes by going to a5. Mate on 5(!) different fields along the a-file in tries+ solution. Switchback by WK in the solution and by the WQ in a try. A very well-deserved 1st Prize!

A nice problem with alternated white move order in try/threat/solution (ABC/BCA/BAC), black correction, unpin key and battery setup. It has some small weaknesses: the refutation of the try is rather obvious, and the alternated move order in the threat is never seen in the actual play. But still, it is a very nice problem! Moremoves.Theme: mate in 4 to 6 moves with set play.

Многоходовки.Тема: четырех - шестиходовка с иллюзорной игрой.

Judges: Valery Barsukov (Russia) & Nikolaj Zuiel (Lietuva)

Judges got 33 tasks (from that 4 - joint) from 16 authors from 10 countries: Austria (P.S.Krug), Argentina (M.G.Garsia), Hungary (G.Tar), Germany (D.Mueller, M.Degenkolbe), Italy (P.Pitton), Poland (J.Brzozowicz, E.Zimmer), Russia (M.Kostylev, A.Melnichuk, P.Murashev), Slovakia (K.Mlynka, Z.Labai), Ukraine (M.Chernyavskyy, M.Gnatyna) and Sweden (I.Lind).

Maybe, from difficulty of theme quality of tasks acting on a competition appeared not high: many compositions have more short, than tasks, set play games and duals both in set play games and in decisions.

From a competition excluded:

- task of M.G.Garcia, P.S.Krug (Ke6 - Kd4) not having an set play game;
- task of M.Gnatyna (Ka4 - Kc4), as there is not an set play game in twin of «b», and in twin of «c» an set play game has duals;
- task of I.Lind (Kh8 - Ka1), having duals in an set play game and the decision begun with a check;
- task of I.Lind (Kd5 - Ke8), having duals in an set play game and in a decision;
- task of M.Chernyavskyy (Kf5 - Ke3), having duals in an set play game and in a decision;
- task of D.Mueller (Kf2 - Kc5), having dual in an set play game;
- task of D.Mueller (Kf2 - Ke4), having duals in a multicode set play game;

- task of M.Kostylev, A.Melnichuk (Ka6 - Ka8) having a great number of set play games including with duals.

Could not apply on differences:

- tasks of E.Zimmer (Kc8 - Ka8), D.Mueller (Kc1 - Ke5) and D.Mueller, M.Degenkolbe (Kd3 - Kf4) having short set play games;

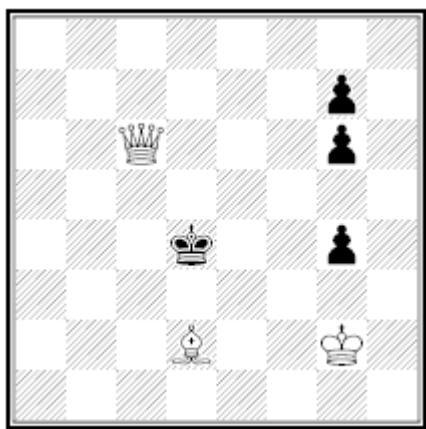

- tasks of D.Mueller (Ke3 - Ke5), E.Zimmer (Kd7 - Ka5), G.Tar (Kh6 - Kf5) and M.Gnatyna (Kd7 - Kd5), in that by the first motions white the free fields are taken away without indemnification for black kings;

- tasks of P.Pitton (Kg3 - Kd4) and M.Gnatyna (Ka4 - Kc4), the decisions of that are begun with taking, and task of P.Murashev (Kf1 - Kh1) with zero.

From remaining tasks it is suggested to mark the following:
